

A box plot showing the distribution of the number of children per family. The x-axis is labeled 'Number of children' and ranges from 0 to 10. The y-axis is labeled 'Frequency' and ranges from 0 to 10. The plot shows a median of 2, with the interquartile range (IQR) from 1 to 3. Whiskers extend from 0 to 4. There are two outliers at 5 and 6.

Box plot showing the distribution of IC values for four methods: Lasso, Ridge, Elastic, and Adaptive. The y-axis represents IC, ranging from 12 to 24. The plot shows that Lasso has a wider distribution and lower median compared to the other three methods, which have very similar, high medians and narrow distributions.

Method	Min	Q1	Median	Q3	Max	Outliers
Lasso	12.0	19.1	21.0	24.3	24.5	None
Ridge	24.2	24.3	24.5	24.7	24.8	17.0, 21.2, 21.8, 22.0, 22.7, 23.5
Elastic	24.2	24.3	24.5	24.7	24.8	None
Adaptive	24.2	24.3	24.5	24.7	24.8	None
